Education

Chennai Institute of Technology — Chennai, India
B.Tech in Artificial Intelligence and Data Science — *2025 – 2029 (Expected)*
CGPA: 7.1

Technical Skills

Languages: Java, C++, Python, JavaScript, HTML/CSS
Web Development: React, Tailwind CSS, Node.js, Express.js, FastAPI, REST APIs
Databases and Tools: MongoDB, SQL basics, Git, GitHub, VS Code

Projects

SpendWise | *React, Node.js, Express.js, MongoDB* — GitHub | Live Demo

- Built and deployed a student finance manager for income, expenses, category budgets and recurring payment records, with amounts displayed in Indian rupees.
- Created a responsive dashboard with monthly summaries, spending charts, searchable transactions and budget progress.
- Connected REST APIs to user-specific MongoDB records; added password hashing, session authentication and input validation.

ScholarPath | *Python, FastAPI, SQLite, HTML/CSS, JavaScript* — GitHub | Live Demo

- Built a scholarship screening application that evaluates eligibility using defined rules for marks, household income, study level and deadlines.
- Added student accounts, saved assessments and JSON exports, with administrator tools to manage and publish scholarship policies.
- Preserved policy versions with assessment results and restricted access to each student's own records.

RuralCare Connect | *Hackathon Prototype* — GitHub | Live Demo

- Developed a hackathon prototype to help rural users navigate healthcare options through AI-assisted intake and rule-based risk classification.
- Matched care needs with nearby facilities using distance, service capability and simulated capacity.
- Separated AI-assisted intake from routing rules and clearly identified simulated availability in the interface.

Internship and Training

AI-ML Virtual Intern — Jan. 2026 – Mar. 2026
AICTE-EduSkills — *Remote*

- Completed a 10-week virtual internship covering artificial intelligence and machine learning foundations.
- Program supported by Google for Developers, India Edu Program.

Certifications

Python Data Structures | University of Michigan, Coursera — June 2025
CS205: Building with Artificial Intelligence | Saylor Academy — Dec. 2024

Achievements

- Selected in Round 1 of the college-level Smart India Hackathon screening.
